Thin Solid Films 357 (1999) 256–260

thin solid films

Subject Index of Volume 357

AlAs/InAs superlattices
Photoluminescence studies of lateral composition modulated short-period AlAs/InAs superlattices, 31
Amorphous materials
Co-sputter deposited Ta–Si diffusion barrier between Si and Cu: the effects of Si content on the barrier property, 237
Amorphous thin films of $Se_{75}Te_{20}Ag_5$
Transient photoconductivity in amorphous thin films of $Se_{75}Te_{20}Ag_5$, 214
Atomic force microscopy
Atomic force microscopy examination of the evolution of the surface morphology of $Bi_4Ti_3O_{12}$ grown by molecular beam epitaxy, 13
Nucleation and growth behavior of epitaxial $Pb(Zr,Ti)O_3$/MgO(100) observed by atomic force microscopy, 166
Preparation, fractal surface morphology and photocatalytic properties of TiO_2 films, 173

Band structure
Variable optical absorption edge in ion beam sputtered thin ytterbium oxide films, 218
Bending
Residual stress in diamond films: origins and modelling, 189
Buffer
Comparison of homogeneously grown and temperature-graded InAlAs buffers in the range 400–560°C: effects on surface morphology and layer stability, 61

CdTe film
Nanocrystalline CdTe films deposited by high-pressure sputtering: carrier transport at low temperature, 102
Chemical hybridization
Characterization of hydrogenated amorphous carbon films produced by plasma-enhanced chemical vapour deposition with various chemical hybridizations, 246
Chemical kinetics
A multispecies step-flow model of growth of compound thin films by MOCVD, 26
Chemical vapor deposition
Low temperature chemical vapor deposition of titanium nitride films from tetrakis(ethylmethylamido)titanium and ammonia, 125
Nucleation and growth behavior of epitaxial $Pb(Zr,Ti)O_3$/MgO(100) observed by atomic force microscopy, 166
Chloride ion
Electrochemical behaviour of zirconium and the anodic oxide film in aqueous solutions containing chloride ions, 202
Combustion chemical vapor deposition
Deposition of zinc oxide thin films by combustion CVD, 132
Conductivity
DC conductivity in the thin-films: Al–(Ge–Se–B)–Al structures, 242
Copper
Co-sputter deposited Ta–Si diffusion barrier between Si and Cu: the effects of Si content on the barrier property, 237
Crystal growth
A multispecies step-flow model of growth of compound thin films by MOCVD, 26
A three-dimensional model of step flow mediated crystal growth under the combined influences of stress and diffusion, 35
Crystallization
A novel approach to prepare zinc oxide films: excimer laser irradiation of sol–gel derived precursor films, 151
$CuInSe_2$ thin film
Growth phases during electrochemical selenization of vacuum deposited CuIn metal layers for the formation of semiconducting $CuInSe_2$ films, 179

Defects
Origins of defects in self assembled GaP islands grown on Si(001) and Si(111), 53
Structural investigation of SiC epitaxial layers grown under microgravity and on-ground conditions, 137
Diamond film
Residual stress in diamond films: origins and modelling, 189
Diamond-like films
Deposition of diamond-like films upon laser irradiation of the interface of a transparent substrate with liquid aromatic hydrocarbons, 144
Diffusion
Three dimensional simulations of island formation in a coherent strained epitaxial film, 8
A three-dimensional model of step flow mediated crystal growth under the combined influences of stress and diffusion, 35
Diffusion barrier
Low temperature chemical vapor deposition of titanium nitride films from tetrakis(ethylmethylamido)titanium and ammonia, 125
Co-sputter deposited Ta–Si diffusion barrier between Si and Cu: the effects of Si content on the barrier property, 237
Disclination
Residual stress in diamond films: origins and modelling, 189
Dissolution of ZrO_2
Electrochemical behaviour of zirconium and the anodic oxide film in aqueous solutions containing chloride ions, 202
DLC on Al_2O_3:TiC

PII: S0040-6090(99)000867-6

The wear effect on microstructure of DLC films PECVD-deposited on Al_2O_3:TiC substrates–a confocal micro-Raman study, 159

Electric field orientation
Orientation, characterization, and photoconductive property of ethylenediamine bridged silicon phthalocyanine polymer thin film, 208
Electrical conductivity
Nanocrystalline CdTe films deposited by high-pressure sputtering: carrier transport at low temperature, 102
Electrical properties
Optical and electronic properties of transparent conducting ZnO and ZnO:Al films prepared by evaporating method, 98
Electrical properties and measurements
DC conductivity in the thin-films: Al–(Ge–Se–B)–Al structures, 242
Electrochemical selenization
Growth phases during electrochemical selenization of vacuum deposited CuIn metal layers for the formation of semiconducting $CuInSe_2$ films, 179
Electrodeposition
Electrodeposition of Sn, Se, SnSe and the material properties of SnSe films, 119
Epitaxial growth
Spontaneous decomposition and ordering during epitaxial growth, 46
Epitaxy
Nanometer-scale imaging of strain in Ge island on Si(001) surface, 22

Finite elements
Three dimensional simulations of island formation in a coherent strained epitaxial film, 8
Fluorescence
Soft X-ray fluorescence measurements of polyimide films, 91

GaP islands
Origins of defects in self assembled GaP islands grown on Si(001) and Si(111), 53
Germanium
Nanometer-scale imaging of strain in Ge island on Si(001) surface, 22
Formation of nanoscale trenches and wires as a pathway to phase-separation in strained epitaxial Ge-Sn alloys, 87
Germanium segregation mechanism
Ge segregation mechanism during Si/Ge multilayer growth, 76
Gravimetry
On the formation mechanism of γ-AgI thin films, 111
Growth mechanism
Nucleation and growth behavior of epitaxial $Pb(Zr,Ti)O_3$/MgO(100) observed by atomic force microscopy, 166

High resolution transmission electron microscopy
Origins of defects in self assembled GaP islands grown on Si(001) and Si(111), 53
Hydrogenated amorphous carbon thin film
Characterization of hydrogenated amorphous carbon films produced by plasma-enhanced chemical vapour deposition with various chemical hybridizations, 246

Impedance
Electrochemical behaviour of zirconium and the anodic oxide film in aqueous solutions containing chloride ions, 202
InAlAs/InP
Comparison of homogeneously grown and temperature-graded InAlAs buffers in the range 400–560°C: effects on surface morphology and layer stability, 61
InAs/InGaAs quantum dot
Shape change of InAs self-assembled quantum dots induced by As/P exchange reaction, 83
InAs/InP quantum dot
Shape change of InAs self-assembled quantum dots induced by As/P exchange reaction, 83
InGaAs/GaAs quantum dots
Island shape instabilities and surfactant-like effects in the growth of InGaAs/GaAs quantum dots, 40
InGaAs
Atomic scale analysis of the indium distribution in InGaAs/GaAs(001) heterostructures: segregation, lateral indium redistribution and the effect of growth interruptions, 18
Interface morphology
Structural investigation of Si/SiGe superlattices on vicinal (113) oriented Si, 71
Iodization
On the formation mechanism of γ-AgI thin films, 111
Ion beam sputtering
Variable optical absorption edge in ion beam sputtered thin ytterbium oxide films, 218
Island shape instabilities
Island shape instabilities and surfactant-like effects in the growth of InGaAs/GaAs quantum dots, 40

Laser deposition
Deposition of diamond-like films upon laser irradiation of the interface of a transparent substrate with liquid aromatic hydrocarbons, 144
Laser fluence
Laser fluence effect on the formation of dielectric $Pb_{1-x}La_xTi_{1-x/4}O_3$ thin films, 232
Laser irradiation
A novel approach to prepare zinc oxide films: excimer laser irradiation of sol–gel derived precursor films, 151
Lattice-mismatched layers
Anisotropic stability analysis of surface undulations of strained lattice-mismatched layers, 57
Line defect
A three-dimensional model of step flow mediated crystal growth under the combined influences of stress and diffusion, 35
Liquid phase epitaxy
Structural investigation of SiC epitaxial layers grown under microgravity and on-ground conditions, 137

Metallization
Co-sputter deposited Ta–Si diffusion barrier between Si and Cu: the effects of Si content on the barrier property, 237
Metalorganic chemical vapor deposition

Shape change of InAs self-assembled quantum dots induced by As/P exchange reaction, 83
Microgravity
Structural investigation of SiC epitaxial layers grown under microgravity and on-ground conditions, 137
Molecular-beam deposition
Spontaneous decomposition and ordering during epitaxial growth, 46
Molecular beam epitaxy
Self-assembled formation of ZnCdSe quantum dots on atomically smooth ZnSe surfaces on GaAs(001) by molecular beam epitaxy, 1
Atomic force microscopy examination of the evolution of the surface morphology of $Bi_4Ti_3O_{12}$ grown by molecular beam epitaxy, 13
Comparison of homogeneously grown and temperature-graded InAlAs buffers in the range 400–560°C: effects on surface morphology and layer stability, 61
Monochromatic light
Transient photoconductivity in amorphous thin films of $Se_{75}Te_{20}Ag_5$, 214
Monte Carlo technique
Ge segregation mechanism during Si/Ge multilayer growth, 76
Morphology
Residual stress in diamond films: origins and modelling, 189
Multisheet arrays
Self-ordering in multisheet arrays of 2D strained islands, 66
Multispecies
A multispecies step-flow model of growth of compound thin films by MOCVD, 26

Nanocrystals
Nanocrystalline CdTe films deposited by high-pressure sputtering: carrier transport at low temperature, 102
Nanoparticles
Deposition of diamond-like films upon laser irradiation of the interface of a transparent substrate with liquid aromatic hydrocarbons, 144
Nanopipes
Structural investigation of SiC epitaxial layers grown under microgravity and on-ground conditions, 137
Nanoscale pattern
Formation of nanoscale trenches and wires as a pathway to phase-separation in strained epitaxial Ge-Sn alloys, 87
Nitrides
Low temperature chemical vapor deposition of titanium nitride films from tetrakis(ethylmethylamido)titanium and ammonia, 125
Nucleation
Nucleation and growth behavior of epitaxial $Pb(Zr,Ti)O_3$/MgO(100) observed by atomic force microscopy, 166

Optical band gap
On the formation mechanism of γ-AgI thin films, 111
Electrodeposition of Sn, Se, SnSe and the material properties of SnSe films, 119
Optical properties
Optical and electronic properties of transparent conducting ZnO and ZnO:Al films prepared by evaporating method, 98
Variable optical absorption edge in ion beam sputtered thin ytterbium oxide films, 218
Organic substances
Preparation, fractal surface morphology and photocatalytic properties of TiO_2 films, 173
Oxidation
Preparation, fractal surface morphology and photocatalytic properties of TiO_2 films, 173
Cation valencies and distribution in the spinels $Co_xCu_yMn_{3-x-y}Fe_uO_{4+\delta}$ ($\delta 0$) thin films studied by X-ray photoelectron spectroscopy, 223
Oxides
Cation valencies and distribution in the spinels $Co_xCu_yMn_{3-x-y}Fe_uO_{4+\delta}$ ($\delta 0$) thin films studied by X-ray photoelectron spectroscopy, 223

$Pb_{1-x}La_xTi_{1-x/4}O_3$ thin films
Laser fluence effect on the formation of dielectric $Pb_{1-x}La_xTi_{1-x/4}O_3$ thin films, 232
Phase separation
Formation of nanoscale trenches and wires as a pathway to phase-separation in strained epitaxial Ge-Sn alloys, 87
Photoconductivity
Orientation, characterization, and photoconductive property of ethylenediamine bridged silicon phthalocyanine polymer thin film, 208
Photoluminescence studies
Photoluminescence studies of lateral composition modulated short-period AlAs/InAs superlattices, 31
Plasma-enhanced chemical vapor deposition
Characterization of hydrogenated amorphous carbon films produced by plasma-enhanced chemical vapour deposition with various chemical hybridizations, 246
Polycrystalline solar cells
Growth phases during electrochemical selenization of vacuum deposited CuIn metal layers for the formation of semiconducting $CuInSe_2$ films, 179
Polymeric phthalocyanine oriented thin film
Orientation, characterization, and photoconductive property of ethylenediamine bridged silicon phthalocyanine polymer thin film, 208
Polymers
Soft X-ray fluorescence measurements of polyimide films, 91

Quantum dot
Self-assembled formation of ZnCdSe quantum dots on atomically smooth ZnSe surfaces on GaAs(001) by molecular beam epitaxy, 1
Three dimensional simulations of island formation in a coherent strained epitaxial film, 8

Raman scattering
The wear effect on microstructure of DLC films PECVD-deposited on Al_2O_3:TiC substrates–a confocal micro-Raman study, 159
Residual stress
Residual stress in diamond films: origins and modelling, 189

Scanning electron microscopy
Laser fluence effect on the formation of dielectric $Pb_{1-x}La_xTi_{1-x/4}O_3$ thin films, 232

Segregation
Atomic scale analysis of the indium distribution in InGaAs/GaAs(001) heterostructures: segregation, lateral indium redistribution and the effect of growth interruptions, 18
Selenides
DC conductivity in the thin-films: Al–(Ge–Se–B)–Al structures, 242
Selenization
Growth phases during electrochemical selenization of vacuum deposited CuIn metal layers for the formation of semiconducting $CuInSe_2$ films, 179
Self-force
A three-dimensional model of step flow mediated crystal growth under the combined influences of stress and diffusion, 35
Self-ordering
Self-ordering in multisheet arrays of 2D strained islands, 66
Shape
Shape change of InAs self-assembled quantum dots induced by As/P exchange reaction, 83
Si/Ge multilayer growth
Ge segregation mechanism during Si/Ge multilayer growth, 76
Si/SiGe superlattices
Structural investigation of Si/SiGe superlattices on vicinal (113) oriented Si, 71
Silicon
Nanometer-scale imaging of strain in Ge island on Si(001) surface, 22
Silicon carbide
Structural investigation of SiC epitaxial layers grown under microgravity and on-ground conditions, 137
Silicon substrates
Origins of defects in self assembled GaP islands grown on Si(001) and Si(111), 53
Sn
Formation of nanoscale trenches and wires as a pathway to phase-separation in strained epitaxial Ge-Sn alloys, 87
Spontaneous decomposition/ordering
Spontaneous decomposition and ordering during epitaxial growth, 46
Spontaneous lateral composition modulation
Photoluminescence studies of lateral composition modulated short-period AlAs/InAs superlattices, 31
Stacking faults
On the formation mechanism of γ-AgI thin films, 111
Step flow
A multispecies step-flow model of growth of compound thin films by MOCVD, 26
A three-dimensional model of step flow mediated crystal growth under the combined influences of stress and diffusion, 35
Stranski–Krastanov growth
Atomic force microscopy examination of the evolution of the surface morphology of $Bi_4Ti_3O_{12}$ grown by molecular beam epitaxy, 13
Atomic scale analysis of the indium distribution in InGaAs/GaAs(001) heterostructures: segregation, lateral indium redistribution and the effect of growth interruptions, 18
Stranski–Krastanov transformation
Island shape instabilities and surfactant-like effects in the growth of InGaAs/GaAs quantum dots, 40
Stress
A three-dimensional model of step flow mediated crystal growth under the combined influences of stress and diffusion, 35
Structural investigation
Structural investigation of Si/SiGe superlattices on vicinal (113) oriented Si, 71
Structural properties
Optical and electronic properties of transparent conducting ZnO and ZnO:Al films prepared by evaporating method, 98
Surface
Three dimensional simulations of island formation in a coherent strained epitaxial film, 8
Surface composition
Cation valencies and distribution in the spinels $Co_xCu_yMn_{3-x-y}Fe_6O_{4+\delta}$ ($\delta 0$) thin films studied by X-ray photoelectron spectroscopy, 223
Surface morphology
Self-assembled formation of ZnCdSe quantum dots on atomically smooth ZnSe surfaces on GaAs(001) by molecular beam epitaxy, 1
Atomic force microscopy examination of the evolution of the surface morphology of $Bi_4Ti_3O_{12}$ grown by molecular beam epitaxy, 13
Anisotropic stability analysis of surface undulations of strained lattice-mismatched layers, 57
Surface undulations
Anisotropic stability analysis of surface undulations of strained lattice-mismatched layers, 57

Temperature gradient
Residual stress in diamond films: origins and modelling, 189
Terrace diffusion
A multispecies step-flow model of growth of compound thin films by MOCVD, 26
Tin selenide
Electrodeposition of Sn, Se, SnSe and the material properties of SnSe films, 119
Titanium nitride
Low temperature chemical vapor deposition of titanium nitride films from tetrakis(ethylmethylamido)titanium and ammonia, 125
Titanium oxide
Preparation, fractal surface morphology and photocatalytic properties of TiO_2 films, 173
Transient photoconductivity
Transient photoconductivity in amorphous thin films of $Se_{75}Te_{20}Ag_5$, 214
Transmission electron microscopy
Atomic scale analysis of the indium distribution in InGaAs/GaAs(001) heterostructures: segregation, lateral indium redistribution and the effect of growth interruptions, 18
Nanometer-scale imaging of strain in Ge island on Si(001) surface, 22
Comparison of homogeneously grown and temperature-graded InAlAs buffers in the range 400–560°C: effects on surface morphology and layer stability, 61

Structural investigation of SiC epitaxial layers grown under microgravity and on-ground conditions, 137
Two-dimensional islands
Self-ordering in multisheet arrays of 2D strained islands, 66

Vacancies
A novel approach to prepare zinc oxide films: excimer laser irradiation of sol–gel derived precursor films, 151
Vacuum evaporated
Transient photoconductivity in amorphous thin films of $Se_{75}Te_{20}Ag_5$, 214
Vicinal (113)
Structural investigation of Si/SiGe superlattices on vicinal (113) oriented Si, 71

Wear test
The wear effect on microstructure of DLC films PECVD-deposited on Al_2O_3:TiC substrates–a confocal micro-Raman study, 159
Wear-resistant coatings
Deposition of diamond-like films upon laser irradiation of the interface of a transparent substrate with liquid aromatic hydrocarbons, 144
Work function
DC conductivity in the thin-films: Al–(Ge–Se–B)–Al structures, 242

X-ray emission
Soft X-ray fluorescence measurements of polyimide films, 91
X-ray photoelectron spectroscopy (XPS)
Cation valencies and distribution in the spinels $Co_xCu_yMn_{3-x-y}Fe_yO_{4+\delta}$ (δ0) thin films studied by X-ray photoelectron spectroscopy, 223
XRD studies
Electrodeposition of Sn, Se, SnSe and the material properties of SnSe films, 119

Ytterbium oxide
Variable optical absorption edge in ion beam sputtered thin ytterbium oxide films, 218

Zinc oxide
Optical and electronic properties of transparent conducting ZnO and ZnO:Al films prepared by evaporating method, 98
Deposition of zinc oxide thin films by combustion CVD, 132
A novel approach to prepare zinc oxide films: excimer laser irradiation of sol–gel derived precursor films, 151
Zirconium
Electrochemical behaviour of zirconium and the anodic oxide film in aqueous solutions containing chloride ions, 202
ZnCdSe
Self-assembled formation of ZnCdSe quantum dots on atomically smooth ZnSe surfaces on GaAs(001) by molecular beam epitaxy, 1
